Experience

Virtual Intern—Generative AI (Google Cloud), Smart Bridge & Smart Internz

Nov 2025–Jan 2026

- Designed and prototyped conversational AI agents using Google Cloud Vertex AI, applying prompt engineering and LLM chaining techniques to build multi-turn workflows.
- Built agentic pipelines integrating Google Cloud AI APIs with custom tool-use logic for automated content generation and intent-based response systems..
- Explored RAG-based architectures and AI service orchestration patterns to improve response relevance in Gen AI applications.

AI Developer Intern, Femira (byMeraji), Indore

Jan 2026–Mar 2026

- Designed and implemented backend APIs using Python and FastAPI, supporting scalable feature enhancements.
- Worked in SDLC and agile workflows including requirement analysis, sprint-based development, and testing cycles.
- Implemented automation scripts and feature improvement to enhance system efficiency and maintainability.
- Used Git and GitHub for collaboration, issue tracking, and maintaining production-ready codebases.

Projects

Project Synapse—AI-Powered Last-Mile Delivery Platform [\[GitHub\]](#) [\[Live\]](#)

Aug 2025–Oct 2025

Python, React.js, TailwindCSS, REST APIs, SQL Model, Leaflet.js

- Designed analytical dashboards using SQL queries to track operational metrics and performance indicators.
- Implemented input validation and structured API request handling to ensure secure and reliable backend communication.
- Performed data analysis using SQL queries to identify trends and business insights.

Sahayak AI—Intelligent Assistance System [\[GitHub\]](#)

Dec 2024–Jan 2025

Python, NLP, AI Models, REST APIs

- Developed an AI-powered assistant using NLP-based conversational workflows for intent detection.
- Implemented contextual response generation for accurate and relevant user interactions.
- Performed API testing and validation to ensure reliable backend performance.

MEDIBOT—AI-Enabled Teleconsultation System [\[GitHub\]](#)

Jul 2024–Aug 2024

Python, React.js, Tailwind CSS, AI/NLP concepts, Python, REST APIs

- Designed a responsive AI-enabled teleconsultation interface to improve health care accessibility.
- Implemented symptom-based health assessment workflows using modular UI components.

Technical Skills

Languages & Frontend: Python, HTML5, CSS3, JavaScript (ES6+), React.js, TailwindCSS

Backend & APIs: Fast API, RESTful API Development, API Integration, JSON Handling

AI/ML : Generative AI, RAG (Retrieval Augmented Generation), Prompt Engineering, basic machine learning concepts, data analyst is using SQL, root cause analysis, basic statistics, Power BI, Advanced Excel, AI Agents, Lang Chain (basic), Workflow Automation

Frame works & Libraries : NumPy, Pandas, Matplotlib, Seaborn, Requests, Pydantic, Django, Flask, Virtualenv

Cloud: AWS (EC2, S3, IAM), Google Cloud

Version Control & Collaboration: MySQL, Mongo DB, Git, GitHub branching, pull requests, and code review workflows.

Education

Vellore Institute of Technology, Bhopal

Oct 2022–Oct 2026

B.Tech in Computer Science and Engineering (Educational Technology)

CGPA: 7.92

Certifications

- AWS Certified Cloud Practitioner—AWS
- Introduction to Machine Learning—Kaggle
- Oracle OCI Generative AI Professional—Oracle
- GenAI-Powered Data Analytics Job Simulation—Forage

Achievements & Activities

- Secured Top 20 position in GrabHack among national-level teams. Participated in SIH, EY National Challenge, Amazon, Myntra, Adobe, and TVS hackathons.
- Served as student coordinator for the TCS campus recruitment process. Vice President, Edu4U Club, leading academic initiatives and student engagement.
